SUMMARY

Software Developer with 10+ months of experience architecting full-stack integrations and cloud-native AI applications. Proven ability to deploy scalable AWS serverless infrastructure and build real-time, low-latency conversational environments. Adept at managing cross-functional teams, evaluating architectural trade-offs, and leading technical demonstrations to solve complex integration challenges.

TECHNICAL SKILLS

Languages	Java, JavaScript, C, SQL, Dart, Python
Frameworks	Flutter, Node.js, Spring Boot, REST APIs
Databases	PostgreSQL, MongoDB, MySQL, Firebase, DynamoDB
Cloud & DevOps	AWS (EC2, S3, IAM, Lambda, Bedrock, Polly, Textract, Amplify, API Gateway), Docker, Kubernetes, Jenkins, SonarQube
Tools	Git, GitHub, Postman, VS Code
Core Concepts	Software Architecture, API Integration, Data Structures & Algorithms, Operating Systems, DBMS, CI/CD

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern — *Technical Hub, Kakinada, AP* May 2025 – Present

- Built end-to-end REST API integrations and UI modules for a Flutter mobile app, driving a **15% increase in user engagement** within 3 months.
- Engineered tailored technical solutions by connecting the Flutter front-end to backend microservices via REST APIs, cutting load time by 20% and ensuring real-time data synchronization.
- Accelerated deployment cycles by collaborating within a 6-person Agile team, facilitating peer code reviews and technical communication for seamless feature integrations.

Cloud Computing Intern — *APSSDC, Kakinada, AP* May 2025 – Jul 2025

- Deployed 3 serverless applications on AWS using Lambda, S3, and DynamoDB, completing all 4 program milestones ahead of schedule.
- Provisioned IAM roles and EC2 instances to enforce least-privilege access, reducing misconfiguration risk across all enterprise project deployments.

PROJECTS

Qlue – Event-Driven AI Voice Mock Interview Platform

[GitHub](#)

Flutter, Node.js, AWS Lambda, API Gateway, Amazon Bedrock, Amazon Polly, PostgreSQL, WebSockets

- Architected a real-time, bidirectional conversational execution environment utilizing native WebSockets and decoupled AWS Lambda handlers to manage turn-flow pacing and minimize audio packet loss.
- Developed asynchronous context-window processors via Amazon Bedrock (Claude models) to cache transient states, maintaining conversational coherence across deep question trees.
- Evaluated architectural trade-offs, removing Firestore in favor of PostgreSQL's JSONB column types to significantly optimize data storage efficiency and retrieval performance.
- Formulated high-throughput background processing infrastructure leveraging Amazon Textract for resume parsing and Amazon Polly Neural engines for streaming low-latency voice synthesis.
- Managed an Agile product release cycle as Team Lead for a 7-member cross-functional development team, driving system integration from architectural drafting to final technical demonstration.

Xpensia – Expense Tracker App

[GitHub](#)

Flutter, Dart, AWS Amplify, DynamoDB

- Designed a Flutter expense tracking app with chart-based visualizations across 5 categories, enabling users to identify spending patterns at a glance.
- Established secure user authentication via AWS Amplify and structured DynamoDB tables to support sub-100ms transaction retrieval.

EDUCATION

Bachelor of Technology in Computer Science

Expected May 2027

Aditya College of Engineering and Technology, Kakinada, AP

CGPA: **8.72** / 10.0

CERTIFICATIONS

- MongoDB Associate Developer** — MongoDB Mar 2026
- GitHub Foundations** — Microsoft Mar 2026

ACHIEVEMENTS & LEADERSHIP

- Top 5 Finalist, T-Hub Project Space (Season 8):** Secured top 5 placement among 100+ entries for the structural engineering design, system stability, and real-time execution performance of Qlue.
- 1st Prize, Campus Connect Case Study:** Led a 3-person team to 1st place among 14 universities in a national LinkedIn case study competition.
- Campus Ambassador — LinkedIn (Sep 2025 – Present):** Expanded LinkedIn Learning adoption by **40%** among students through 5 on-campus technical enablement workshops featuring invited industry speakers.
- Event Coordinator — Tech & Cultural Fest:** Directed registration, scheduling, and judging logistics for a coding contest with **200+ participants**, demonstrating strong stakeholder communication and event execution.
